RE: **Class and Hotel Details**

CLASS: **MapAnalyzer2 Training**

LOCATION: **Zoom Platform**

CLASS TIME:

There will be one full day of instruction ,the course will begin at 8:30 a.m. and end at 4:30 p.m. This course will be provided on the Zoom learning platform. Zoom link and information will be sent prior to the class beginning.

This class introduces users to the MapAnalyzer2 environment, and provides training in teaching users how to navigate parcel maps, explore and manage GIS data, utilize mapping tools, and perform essential parcel editing functions including splits, merges, attribute updates, and maintaining accurate parcel records.

MapAnalyzer2 is designed to be intuitive, and users familiar with the original MapAnalyzer should find the tools and navigation recognizable. This sessions will support a smooth transition into the updated environment while also creating space for questions, feedback, and user engagement throughout the training. MapAnalyzer2 in the LandMark CAMA system will launch on July 6th, 2026, we encourage all LandMark CAMA users to participate in this training.

If you plan to enroll in this class, we will look forward to seeing you for **MapAnalyzer2 Training**.

Sincerely,

Gary Snyder
Director
